

Auckland Airbnb Analytics - Business Insights Report

Executive Summary

This report summarises key findings from an end-to-end Airbnb data analytics project developed using Excel, SQL Server, and Power BI. The dashboard analyses listing performance, pricing, occupancy, host performance, customer ratings, and neighbourhood-level revenue across Auckland.

Key Insights

1. **Townhouses are the top revenue-generating property type**, producing approximately **\$1.0M** in revenue, followed by Houses (~\$0.89M) and Apartments (~\$0.56M).
2. **Mission Bay is the highest revenue-generating neighbourhood** (~\$0.67M), followed by Ponsonby (~\$0.55M), indicating these locations have the strongest earning potential.
3. **Average occupancy is 65.42%**, suggesting healthy demand while leaving opportunities to increase booking utilisation.
4. **Average nightly price is approximately \$360**, positioning many Auckland listings within the premium accommodation market.
5. **Average guest rating is 4.18/5**, indicating positive guest experiences overall.
6. **The dataset contains 50 listings and more than 8,200 reviews**, providing a reliable sample for performance analysis.
7. **Sophia is the highest revenue-generating host**, with Ava and Mason following closely behind.
8. **Sophia also records the highest average guest rating**, demonstrating that excellent guest satisfaction can align with strong financial performance.
9. **Average host response rate is approximately 86%**, indicating good responsiveness across hosts.
10. **Townhouses achieve the highest occupancy rate (78.7%)**, while Apartments show significantly lower occupancy (42.4%).
11. **Herne Bay has the highest average nightly price**, reflecting its premium market positioning.
12. **St Heliers records the highest occupancy (95.8%)**, highlighting exceptionally strong booking demand.
13. **Ponsonby combines strong occupancy with high revenue**, making it one of the most balanced and profitable neighbourhoods.
14. **Neighbourhood ratings remain above 4.0**, indicating consistently positive guest satisfaction.
15. **Parnell records the lowest average rating among the displayed neighbourhoods**, presenting an opportunity to improve guest experience.

Business Recommendations

- Increase marketing investment in Mission Bay and Ponsonby.
- Expand townhouse listings where possible due to their strong revenue performance.

- Benchmark top-performing hosts and share best practices.
- Review pricing strategies alongside occupancy trends rather than relying on price alone.
- Improve lower-rated listings through enhanced amenities, cleanliness, and guest communication.
- Monitor occupancy and revenue together to optimise pricing decisions.
